

## Your Smile Is Showing.

Greetings friends,

A community of needy children are currently living in Nevada and you may not even know it. Children who live with daily oral pain may never show any signs of being in pain. Many of the children we see are afraid to show their smile.

Approximately **70% of children** in Nevada have current or treated decay. The national average is 53%.

**Future Smiles is determined to end oral pain and suffering among Southern Nevada's neediest children**

**We cannot fight alone and Nevada's neediest children desperately need your help.**

Every day, Future Smiles fights dental decay before it starts by providing dental cleanings, fluoride treatments, and placing protective dental sealants on teeth.

We provide our services where children spend a significant portion of their day- in school during school hours.

## WHY?

Dental sealants are a low cost, high impact preventive oral health service.

**National Costs**

\$44 dental sealant	<b>VS</b>	\$146 two-surface amalgam filling
		\$197 two-surface composite filling
		\$918 root canal
		\$1,026 crown
		\$147 tooth extraction

On March 22nd, Nevada's Big Give will bring Nevadans together for a day of giving.

**We ask for your support now through March 22nd to help us provide 500 dental sealants to needy children.**

**#SlayDentalDecay**

**Your gift of \$10 will protect a child's tooth with a dental sealant.**

**Pledge Your Support Today**

Future Smiles is a 501(C)(3) Non-Profit Organization and your donation is 100% tax-deductible. Future Smiles has been partnering with the community since 2009 to bring preventative dental services to children through an integrated school-based program.
